

## How To Participate in the HydroMiner ICO Using Mist (Ethereum Wallet)

Disclaimer: We offer the following instructions only as guidance. Buyers should do their own research and not rely solely on material we are presenting. We make no representations or warranties that the following material is complete or accurate, or that Mist Ethereum Wallet (or any associated software or services) will be reliable or function as described. As such, Buyers assume all risks associated with the use of Mist, Ethereum Wallet (or any other ERC20 wallet) in connection with the token sale. Please consult the full Prospectus on [www.hydrominer.org](http://www.hydrominer.org).

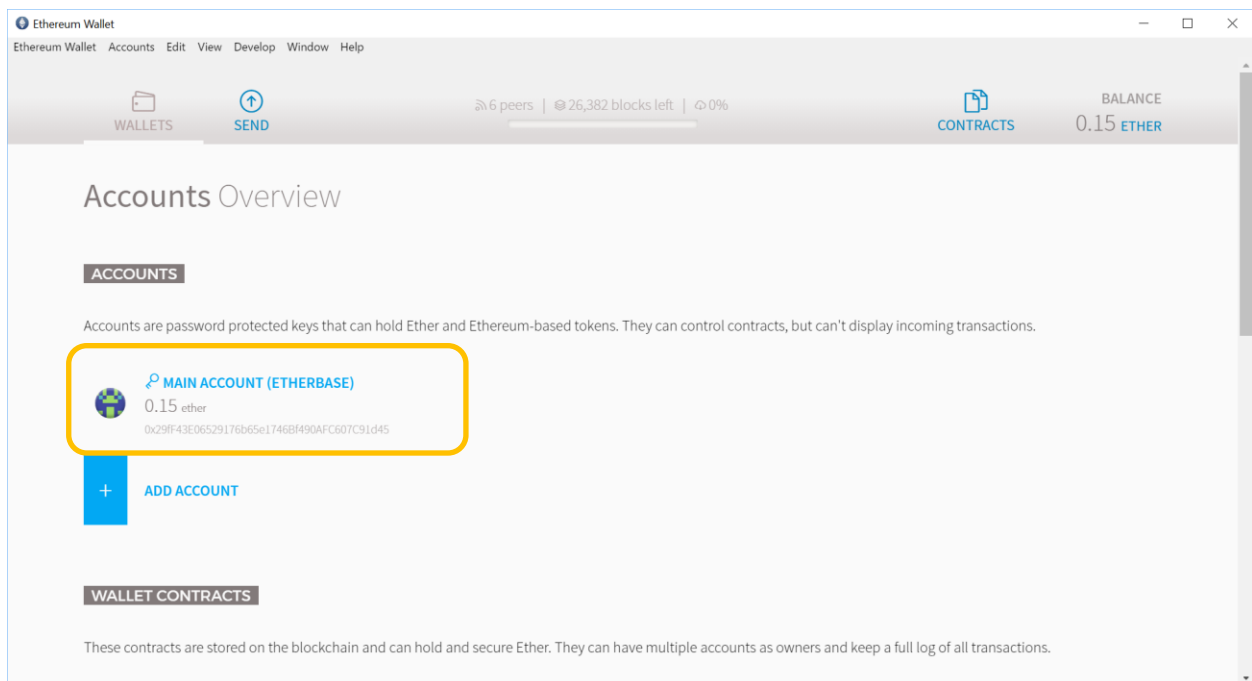

### 1) Make Sure the Wallet is Synced

Please note that the syncing process can take a number of hours. Make sure you are syncing with the Main Network, NOT the Testnet.

### 2) Send Ether to the ICO Address

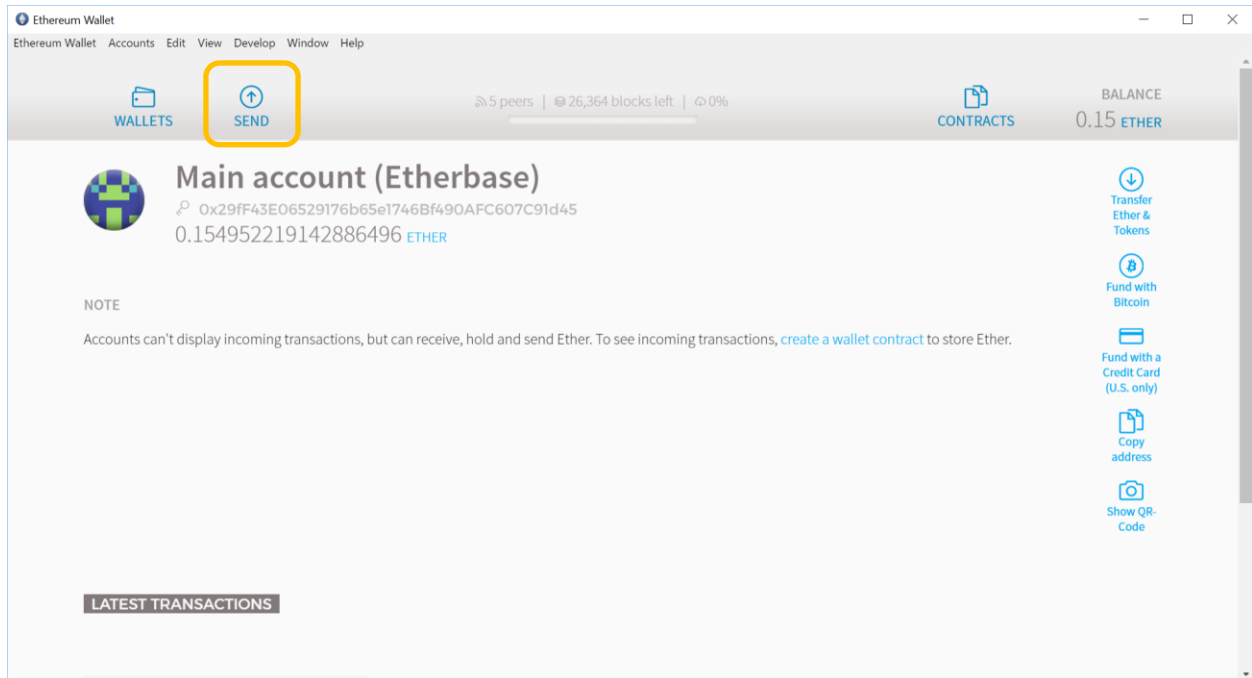

Before sending ETH, ensure the the token sale has commenced.

Open the account from which you wish to send Ether:

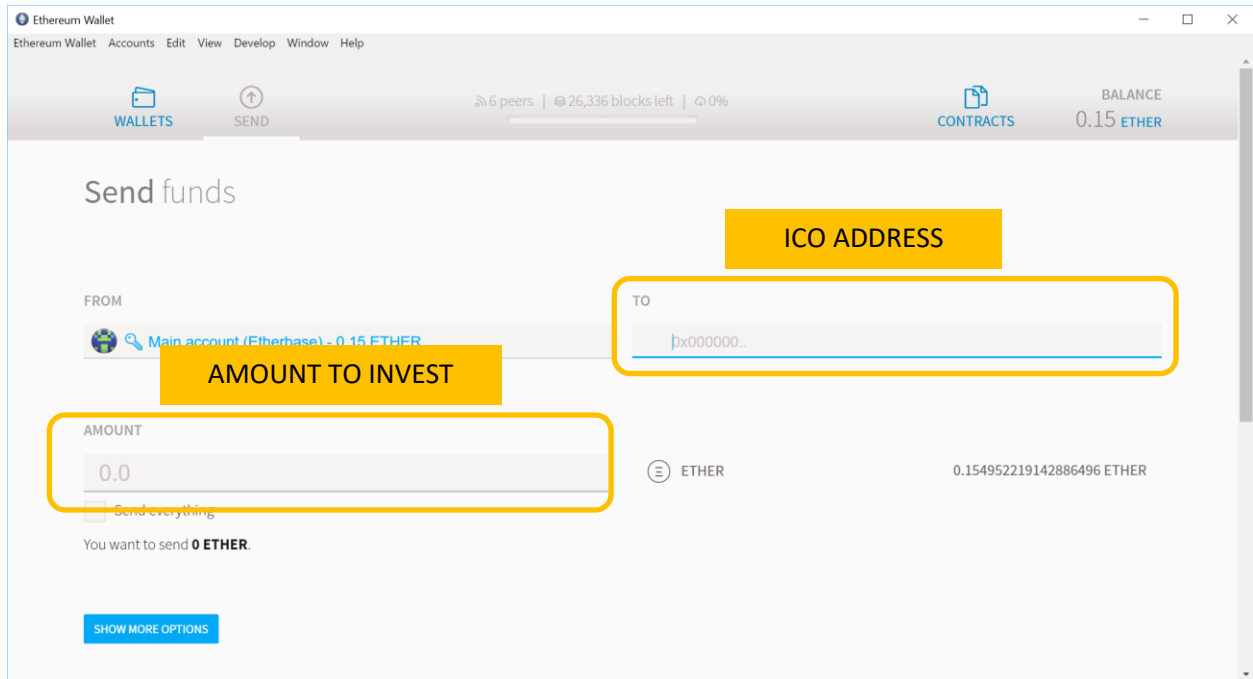

Click on "SEND":

Enter the ICO smart contract address as provided on [www.hydrominer.org](http://www.hydrominer.org) in the "TO" field. Make sure the address is correct. Enter the amount of ETH to invest.

Click on “SHOW MORE OPTIONS”.

- No data needs to be entered.
- Make sure the “gas” amount equals at least 200,000. If it does not match that amount, increase it.

Click “SEND TRANSACTION”.

Send transaction

0x29ff...1d45 → 0.15<sub>4469196142886496</sub> ETHER → 0x29ff...1d45

Estimated fee consumption	0.00048302 ether (21,001 gas)
Provide maximum fee	4.6 ether (200000,000 gas)
Gas price	0.023 ether per million gas

Enter password to confirm the transaction

CANCEL SEND TRANSACTION

You have now purchased the amount of H2O Tokens that corresponds to the amount of ETH you sent.

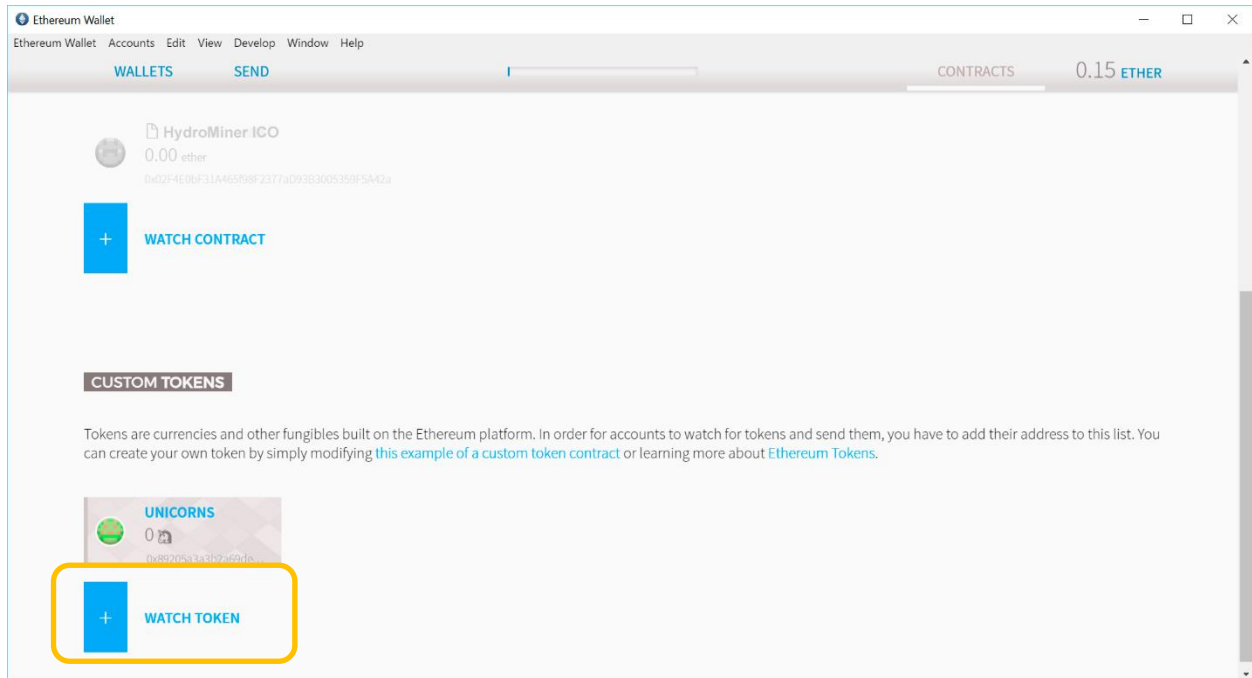

### 3) Watch Token

Click on "CONTRACTS".

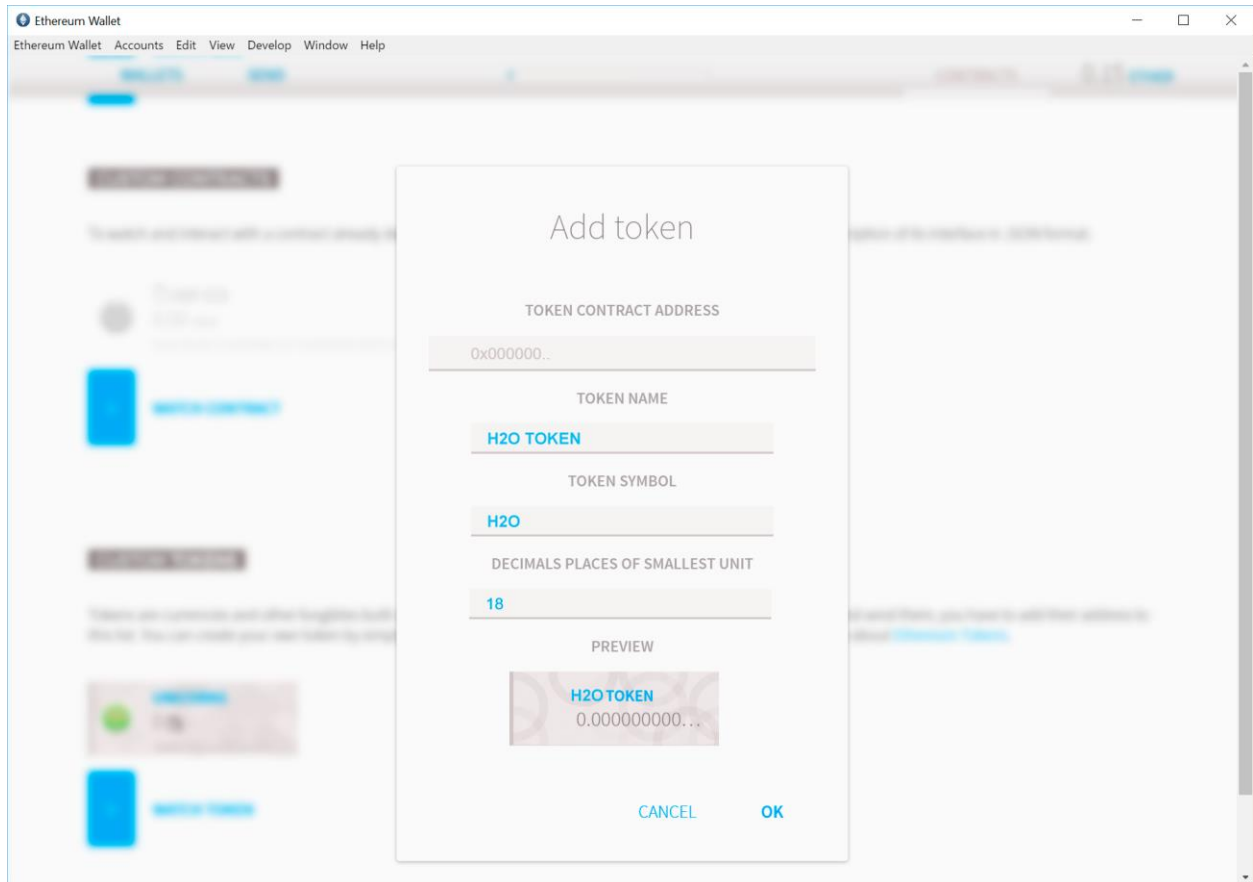

The screenshot shows the Ethereum Wallet application window. The title bar reads "Ethereum Wallet". The menu bar includes "Accounts", "Edit", "View", "Develop", "Window", and "Help". The main interface has a top navigation bar with "WALLETS" and "SEND" buttons on the left, and "CONTRACTS" (highlighted with a yellow box) and "BALANCE 0.15 ETHER" on the right. The status bar shows "10 peers", "26,031 blocks left", and "1%". The main content area is titled "Accounts Overview" and contains a section for "ACCOUNTS" with a description: "Accounts are password protected keys that can hold Ether and Ethereum-based tokens. They can control contracts, but can't display incoming transactions." Below this, there is a "MAIN ACCOUNT (ETHERBASE)" with a balance of "0.15 ether" and a public key "0x29f43e06529176b65e1746bf490afc607c91d45". There is also an "ADD ACCOUNT" button. At the bottom, there is a section for "WALLET CONTRACTS" with a description: "These contracts are stored on the blockchain and can hold and secure Ether. They can have multiple accounts as owners and keep a full log of all transactions."

Click on “WATCH TOKEN”.

On the page that appears, add the ICO address you used to buy H2O Tokens. Then add the name “H2O Token” and the symbol “H2O” and “18” for the number of decimals. Click “OK.”

This will now display your H2O Tokens!

### **Verifying That You Own H2O Tokens**

If you have sent funds and the H2O tokens are not showing up yet, it may be due to syncing issues or another delay. You can however verify on our Smart Contract page on Etherscan that you have H2O tokens on your wallet.
